**Subject:** Re: Communications planning in advance of Feb. 26 meeting

Hi everyone,

I just wanted to give you a quick update about parking. I've been told that parking enforcement services has been made aware of our meeting and we will be able to park in the lots adjacent to the building. My phone number is 951 212 5082 in case you need to reach me. Please let me know if I can help in any way.

Thanks,  
Marisa

Hi Jason,

The plan is for you to start off the meeting, so you'll be speaking first. And you can send your slides to me.

Thank you!  
Marisa

Hi Jane,

Thanks for sending. I'll introduce the network briefly and state from the overview slide which teams we will hear from today.

Will someone be going before me on Wednesday?

Jason

P.S. Who do I send my slides to?

Hi all,

On Tuesday, we received this request from DEQ to get more information about Weds' symposium. I spoke to Laura Leonard on Weds about what they wanted to talk about and we had hoped to schedule a call, but I think snow and coal ash ended that plan.

So DEQ is concerned about what is said at this forum with regards to the consent decree with Chemours. She's worried that people will have a lot of questions about that. I think from our end as long as the session focuses on the research and potential resources available to people, I think we'll be fine. I think if we open the meeting with that focus that will help reinforce it.

We will be using cards to take questions from the audience, so we'll be able to put the consent decree questions aside, but will also be able to document what the questions are and share those with DEQ and other interested parties.

Thanks for being part of this symposium. We've already heard from one of our community groups that they have over 50 people planning to attend.

See you Weds.

Jane

Hi Laura,

Jane Hoppin at NCSU (included on this message) is organizing the Feb. 26 meeting, so I will let her suggest times for a call. I'll join too, if my schedule allows. Best,

Kathleen

**Subject:** Communications planning in advance of Feb. 26 meeting

Ms. Gray,

I was provided your name and contact information as the person who is spearheading the PFAST Network's communications efforts about the research it is conducting on a variety of PFAS in North Carolina.

On behalf of DEQ's Assistant Secretary for Public Affairs Sharon Martin and DHHS' Communications Director Chris Mackey, I would like to request a time for all of us to discuss upcoming communications efforts regarding the Network's Feb. 26 meeting. I am the public information officer for the Division of Waste Management, which is one of three divisions involved in the Chemours GenX investigation and other PFAS work across the state.

As we understand it, the upcoming meeting is geared toward providing Fayetteville-area residents with an update on the Network's research about PFAS in food. We would like to discuss how those results are going to be relayed and ensure that there is a communications strategy about relaying how the three entities are coordinating efforts.

If possible, please send me some available dates and times so that we can schedule a call. Please feel free to include others at the Network who may be involved in your communications planning.

Thank you,  
Laura J. Leonard
